“My goal, especially with the senior population, is to ensure every patient feels heard, respected, and confident in their healthcare journey.”

About Aniece Smith, NP

Aniece Smith was inspired to pursue medicine by a deep desire to make a meaningful difference during life's most vulnerable moments. "I have always been drawn to understanding people beyond their symptoms — listening to their stories, building trust, and partnering with them to improve their health," she says. As a nurse practitioner, Aniece combines her love of science, critical thinking, and compassionate care to empower patients through education, prevention, and evidence-based treatment. "My goal, especially with the senior population, is to ensure every patient feels heard, respected, and confident in their healthcare journey," she says.

Aniece's approach to care is guided by a philosophy she calls **C.A.R.R.E.** — she is **C**oncerned about what matters most to her patients, holds herself **A**ccountable, sets **R**ealistic expectations, strives to be a **R**eliable resource, and brings genuine **E**xcitement and gratitude to every patient encounter. "You will never be just another appointment to me," she says. "I want my patients to leave understanding their health and feeling confident about the care they are receiving."

In addition to her clinical work, Aniece is also an author. When not with patients or writing, she enjoys spending time with her family, tackling home renovation projects, traveling, journaling, sketching, and chasing adventures with her kids.
