“I enjoy working with seniors because many of them have complicated and challenging health concerns that I want to help them understand and manage well.”

About Sumi Ittan, MD

One of the things Dr. Sumi Ittan enjoys most about being a physician is developing trusting relationships with her patients and helping them live full lives at any stage of health. "I enjoy working with seniors because many of them have complicated and challenging health concerns that I want to help them understand and manage well," says Dr. Ittan. "I loved my grandparents a lot, and they have an indelible place in my heart. I see their faces when I'm with my senior patients, and I naturally want to provide the very best care for them." That includes listening, understanding their needs and developing care plans "based on practical management strategies that get the best results."
