“My goal is to be an advocate for my patients and educate them about medicine, so they can make informed decisions about their health.”

About Evelyn Campbell-Bayaan, MD

Dr. Evelyn Campbell-Bayaan’s interests in biology and working on puzzles as a child helped her decide to become a doctor. “Biology helps you know how the body works,” Dr. Campbell-Bayaan says. “I use puzzle-solving skills every day to discover my patients’ health problems, and find the best way to treat them. I decided to work with Seniors because of their special needs. Unfortunately, they often have limited resources to address their health. My goal is to be an advocate for my patients and educate them about medicine, so they can make informed decisions about their health. I support involving their loved ones in health discussions. All of this can help seniors have the best quality of life possible.”
