

**“The seniors of today literally and figuratively paved the way for me to be where I am physically and professionally and focusing my scope of practice on them is my way to show my appreciation.”**

#### **About Deji Delano, DO**

Dr. Deji Delano’s interest in medicine began at a young age. As a physician, he strives to leave a “positive impact” on patients, just as his pediatrician did for him. “I let them know that we are partners and that my goal for them is to keep them healthy and happy,” he says. He strives to act as an advocate for his patients and is grateful to serve the senior population. “The seniors of today literally and figuratively paved the way for me to be where I am physically and professionally and focusing my scope of practice on them is my way to show my appreciation,” he explains.

In his spare time, Dr. Delano likes attending sporting events and listening to music. He also enjoys baking and taking cooking classes.
