“What I find most rewarding in this specialty is the opportunity to actively engage in the ongoing comprehensive care of each patient.”

About Manu Jacob George, MD

Dr. Manu Jacob George was first inspired to pursue medicine while caring for his grandmother, who had Alzheimer’s. Serving “as a live-in volunteer at an ashram and mission hospital” further cemented his passion. He loves connecting with patients and their families. “What I find most rewarding in this specialty is the opportunity to actively engage in the ongoing comprehensive care of each patient,” he says. He describes himself as having “an unquenchable thirst for medical knowledge, an unwavering resolve to confront challenges head-on, and a deep-seated commitment to providing care to both individuals and communities.”

Dr. George loves playing badminton, hosting family gatherings, and spending time with friends in his free time.
