

“I choose medicine because I get to help people understand their health and help people stay healthy.”

About Tri Kieu, MD

Dr. Tri Kieu, known familiarly as “Dr. Q,” understands the difficulties of navigating the healthcare system. “I choose medicine because I get to help people understand their health and help people stay healthy,” he explains. To better provide personalized care, he always takes the time to get to know his patients. “I want my patients to have more happy days,” he says. In his practice, he emphasizes the importance of prioritizing preventative care over reactive care, especially for the senior population. “Our health is a daily hobby and needs some love daily,” he says.

Dr. Q enjoys hanging out with friends, watching movies, and traveling in his off time. He is also a self-proclaimed “foodie.”
