“I love getting to know my patients and hearing stories about their lives.”

About Hannah Day, M.D.

While studying bioengineering in college, Dr. Hannah Day was drawn to learning about the complex medical aspects, which led her to pursue a career in healthcare. She adds, “I also wanted a job where I got to work with and talk to people.” Dr. Day especially enjoyed serving senior patients during her residency. “I love getting to know my patients and hearing stories about their lives,” she says. As a physician, she is committed to helping her patients have “more good days to enjoy.”

When Dr. Day is not caring for patients, she can be found gardening, baking, or spending quality time with her family and dogs. She also enjoys reading, knitting, and sewing.
