“By helping patients live healthier lives, I am not only helping the patient but also the family members who might be dependent on them.”

About Muhammad Ahmed, MD

Dr. Muhammad Ahmed was drawn to medicine by a deep passion for helping people during their most vulnerable moments — and the senior population holds a special place in his heart. He builds genuine connections with his patients by going beyond the clinical — sharing about himself while learning about his patients' families, support systems, and personal lives. "I like to know not only about the patient, but also about their families and the support system they have," he says.

For Dr. Ahmed, the impact of great care extends beyond the individual. "By helping patients live healthier lives, I am not only helping the patient but also the family members who might be dependent on them," he says. His commitment to showing up for patients in their most challenging moments is at the heart of everything he does.

When not with patients, Dr. Ahmed enjoys watching movies — especially horror films — and experimenting in the kitchen with different cuisines from around the world.
